	(from Use Case Model)	(from Use Case Model)
Student		
(from Use Case Model)		
Use Case Number:		
	UC1	
Use Case Name:	Maintain Planned Course Work	
Actor (s):	Student, Advisor	
Maturity:	Focused	
Summary:	<u>Students</u> , or an <u>Advisor</u> aiding a student, will create and maintain their <u>student</u> <u>preferences</u> for future semesters.	
Basic Course of Events: (luồng nghiệp vụ chính)	Actor Action	System Response
	1. Perform {Login Authentication}	
		2. System displays welcome page with main features for actor to choose from.
	3. The use case begins when the Student actor selects to maintain planned coursework. <b>A1.</b>	
		4. The system displays the <u>student's</u> <u>program of study</u> and also returns any previously planned <u>course preferences</u> .
	5. The Student and Advisor actors select the future courses, term, day and time. (Repeat as many times as necessary.) A2	
	6. The Actor selects to save the information. <b>A3</b>	

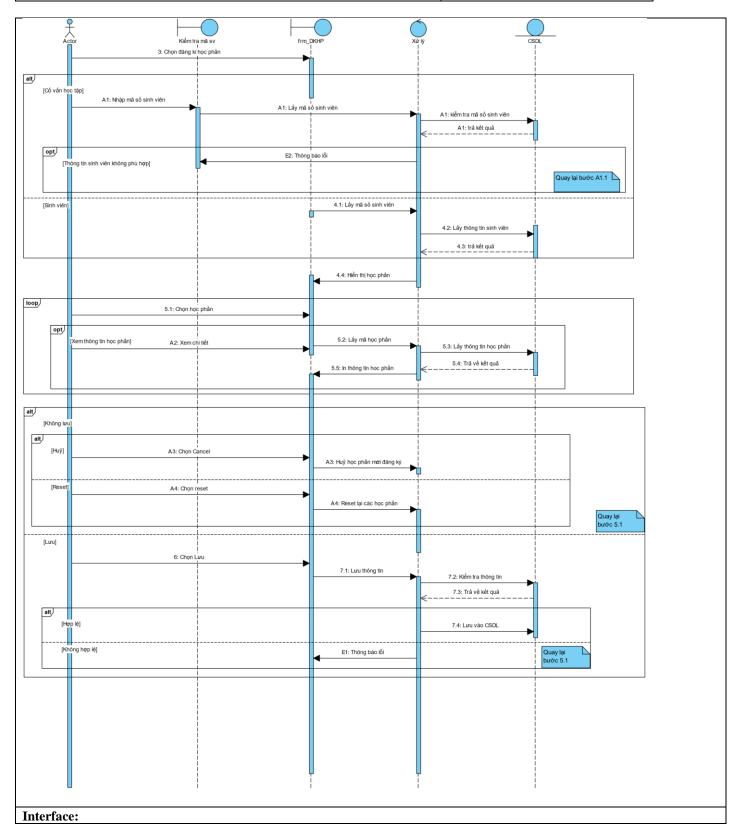

Course Cast	Version: 2.0
Use Cases	Date: 12-5-07

		7. The system validates the planned coursework entered by the Actor.  {Validate Planned Courses}	
		8. The system updates the students planned coursework in the database and informs the actor that the information was updated successfully. The use case ends.	
Alternative Paths:	A1.		
(luồng phụ)	Actor Action	System Response	
	1. The Advisor actor enters the student's <u>UNFID</u> for the appropriate student.		
		2. The system validates that the <i>UNFID</i> . <b>E2</b>	
	3. The Advisor actor selects to maintain planned coursework.	1	
		Return to step 4 of the Basic Course of Events.	
	<b>A2.</b> An actor has the ability to review continuous when selected.	<b>A2.</b> An actor has the ability to review catalog information for a particular course when selected.	
	A3. 1. The actor has the ability to "Cancel" previously saved version. Returns to st 2. The actor has the ability to "Reset" in coursework for a student. Returns to ste	nformation which removes all planned	
Exception Paths:	six courses selected for a term, planning	E1. At {Validate Planned Courses} if errors ( <i>prerequisites</i> not met, more than six <i>courses</i> selected for a term, planning a <i>course</i> that the <i>student</i> has already passed), the system indicates the courses where there are errors. Returns to Basic Flow Step 5.	
	user that their <u>UNFID</u> cannot be found Alternate Path 1 (A1).	<b>E2.</b> If the system cannot find the <u>UNFID</u> in stored data, the system informs the user that their <u>UNFID</u> cannot be found and the actor is returned to step 1 of Alternate Path 1 (A1).	
Extension Points:	Review of the planned <u>courses</u> compare taken, currently registered for or future	Validate Planned Courses Review of the planned <u>courses</u> compares against courses the student has already taken, currently registered for or future planned courses to verify that the <u>student</u> has met the necessary <u>prerequisites</u> or the <u>prerequisite</u> is planned. (See Business Rule 2.1) E1	
Triggers:	Actor wishes to input student preference	es for future semesters.	
Assumptions: Preconditions:	The Advisor will not make any changes None.	The Advisor will not make any changes without first consulting the Student.  None.	
Post Conditions:	The updated <u>student preferences</u> are say	ved to stored data.

Administration Representative	Generate Course Offerings	Printer  Login Authentication
Use Case Number:		
ese case ramser	UC2	
Use Case Name:	Generate Course Offerings	
Actor (s):	Advisor, Administration Representative	
Maturity:	Focused	
Summary:	Administration will generate a <u>course offering</u> for a future semester based off of <u>student preferences</u> .	
HBasic Course of Events:	Actor Action	System Response
	1. Perform {Login Authentication}	
		2. System displays welcome page with main features for actor to choose from.
	3. The Advisor or Administration Representative actor selects to generate a <i>course offering</i> .	
		4. The system requests the <u>semester</u> and year for which the <u>course offering</u> will be generated.
	5. The actor inputs the <u>semester</u> and year for which the <u>course</u> <u>offering</u> will be generated.	
		6. The system validates the entered <i>semester</i> and year. <b>E1.</b>

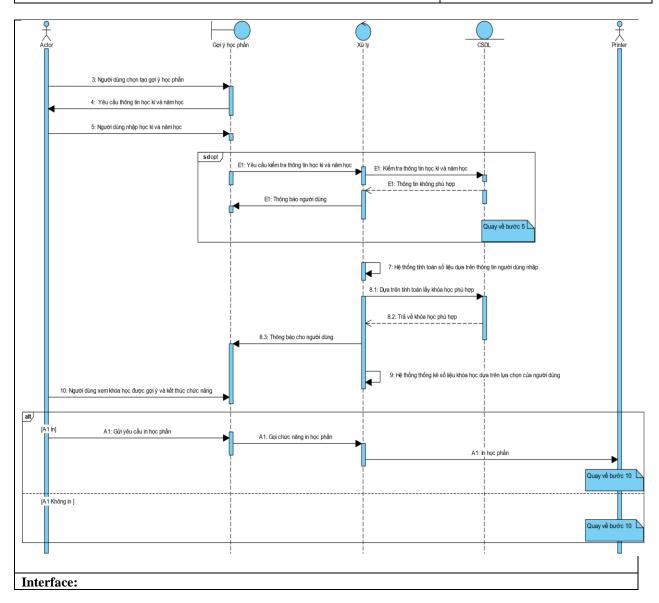

Course Cast	Version: 2.0
Use Cases	Date: 12-5-07

		7. The system calculates the
		course offering for the selected
		semester based on student
		<u>preferences</u> .
		The calculation assigns weights to: number of <u>students</u> who have planned a <u>course</u> , the seniority of the <u>student</u> , differentiation
		between <u>major requirements</u> versus <u>elective requirements</u> , and whether the <u>course</u> is used in multiple tracks.
		8. Based on the calculations and the <u>students'</u> day and time preferences, the system displays this <u>course offering</u> along with its <u>course information</u> .
		9. The system generates the student preferences statistics for the parameters selected by the actor. It will include: course information, subtotals of time and day, and totals.
	10. The actor views the generated <i>course offering</i> . The use case end here. <b>A1</b>	
Alternative Paths:	A1. From this point the actor can select to print the generated <u>course</u> <u>offering</u> . After that is completed the actor is returned to the same point in the flow of events.	
<b>Exception Paths:</b>	.E1. If the actor enters a <u>semester</u> that has already occurred, the system prompts the user and requests another <u>semester</u> . Control returns to step 5 of the Basic Course of Events.	
<b>Extension Points:</b>	None	
Triggers:	Actor wishes to generate a <u>course of</u>	fering.
Assumptions:	Student preferences have been entered	ed into the system.
Preconditions:	The actor possesses the correct authorized a	ority level.
Post Conditions:	A <u>course offering</u> will be generated.
